

# Software installed on your computers

## **Overview**

This document provides a brief overview of the application software which is included with most rollout computers.

The software actually included with your computers may vary a little from the list below, depending on the configuration of the image which was available at the time equipment was distributed to your school.

Some of this software is freely available, and can be downloaded from the addresses listed within this document.

The website associated with the software often includes information and tutorials about using the software.

Of course, there is also a comprehensive collection of utility and system software included on your computers, but that software is not listed in this document.

Schools may also add their own licensed software to the supplied image.

## **Software List**

### **1. 2005 World Book Encyclopedia**

Searchable multimedia encyclopedia. A useful companion to Internet searches.  
[www.mackiev.com](http://www.mackiev.com)

### **2. ACS Logo**

A new implementation of the turtle logo. Students learn to “program” the turtle to move to vector points. Great maths activity.  
[www.alancsmith.co.uk/logo/](http://www.alancsmith.co.uk/logo/)

### **3. AppleWorks**

All-in-one office suite. Students are able to combine spreadsheets, databases, word-processing, painting and vector drawing in one document.  
[www.apple.com/appleworks](http://www.apple.com/appleworks)

### **4. Array**

Simple pegboard drawing and animation program.  
[www.mediumk.com/array/macosx/](http://www.mediumk.com/array/macosx/)

### **5. ArtRage**

Very realistic painting program. Paint with oils, sketch with pencils, sprinkle glitter, etc. Also trace existing photos and drawings.  
[www.ambientdesign.com/artrage.html](http://www.ambientdesign.com/artrage.html)

### **6. Audacity**

Full featured sound recording and editing software.  
[audacity.sourceforge.net/](http://audacity.sourceforge.net/)

### **7. Calculator**

Handy on-screen calculator.

### **8. Chess**

Play another student or the computer.

### **9. DaisyMaths**

Variety of maths activities for students aged 3-12.  
[www.daisymaths.com.au/aboutme.html](http://www.daisymaths.com.au/aboutme.html)

### **10. Dictionary**

On-screen dictionary and thesaurus. Also accessible from within compatible programs.

### **11. EdenGraph**

A graphing calculator which is able to plot two-dimensional graphs using standard algebraic or trigonometric functions.  
[www.edenwaith.com/products/edengraph/](http://www.edenwaith.com/products/edengraph/)

## **12. FireFox**

An alternative browser which may be useful for websites that do not display correctly using Safari.

[www.mozilla.com/](http://www.mozilla.com/)

## **13. FreeMind**

Mind-mapping software similar to *Inspiration* and *Kidspiration*

[freemind.sourceforge.net/](http://freemind.sourceforge.net/)

## **14. GarageBand**

Fantastic software for students to create and record their own music and podcasts.

[www.apple.com/ilife/garageband/](http://www.apple.com/ilife/garageband/)

## **15. iChat**

Video and audio conferencing software. Drag'n'drop documents to other people on your network.

[www.apple.com/macosx/features/ichat/](http://www.apple.com/macosx/features/ichat/)

## **16. iDVD**

Create and burn music, photo and movies to widescreen DVD. Includes a wide range of menu templates.

[www.apple.com/ilife/idvd/](http://www.apple.com/ilife/idvd/)

## **17. Image Tricks**

Edit and generate images. Use filters to apply special effects to your photos and artwork.

[www.belightsoft.com/products/imagetricks/](http://www.belightsoft.com/products/imagetricks/)

## **18. iMovie HD**

Create Hollywood-style movies using cinematic titles, new audio tools, and real-time video effects, then share them in a video podcast or DVD.

[www.apple.com/ilife/imovie/](http://www.apple.com/ilife/imovie/)

## **19. iPhoto**

Import, edit, apply special effects, catalogue and share your photos on CD, via your network, or on the web.

[www.apple.com/ilife/iphoto/](http://www.apple.com/ilife/iphoto/)

## **20. iTunes**

Import your CDs, download music, videos and podcasts, and synchronise with your iPod.

[www.apple.com/itunes/](http://www.apple.com/itunes/)

## **21. iWeb**

Use iWeb templates to create websites and blogs complete with podcasts, photos, and movies.

[www.apple.com/ilife/iweb/](http://www.apple.com/ilife/iweb/)

- 22. iWork (Trial)**  
*Pages* desktop publishing software and *Keynote* presentation software - 30 day trial software.
- 23. MarbleBlast**  
Popular game
- 24. Microsoft Office**  
Word, Excel and Powerpoint
- 25. Mozilla**  
Alternative web browser. Also includes Mozilla Composer, which can be used for editing your Intranet web pages.  
[www.mozilla.org](http://www.mozilla.org)
- 26. Nanosaur**  
Popular game
- 27. Nvu**  
A web page editor for your Intranet (or Internet) pages. This is a derivation of Mozilla Composer (above)  
[www.nvu.com](http://www.nvu.com)
- 28. Palette**  
Simple painting program  
[www.haranbanjo.com/palette/](http://www.haranbanjo.com/palette/)
- 29. Safari**  
Apple's default web browser  
[www.apple.com/macosx/features/safari/](http://www.apple.com/macosx/features/safari/)
- 30. SeaMonkey**  
This is the new name for the Mozilla project - a web browser/web editing suite.  
[www.mozilla.org/projects/seamonkey/](http://www.mozilla.org/projects/seamonkey/)
- 31. WordNet**  
An online lexical reference system (it's a dictionary/thesaurus and much more) developed at Princeton University's Cognitive Science Laboratory  
[wordnet.sourceforge.net/](http://wordnet.sourceforge.net/)
